

To Whom It May Concern:

I have hired MWR on projects for many years, most notably on the Jazz Aspen Snowmass Labor Day and June Experiences. Whenever I need waste management for an event MWR is my first phone call.

MWR consistently provides reliable quality service with a highly professional staff. Their event service is highlighted by the personnel they bring on site. Jeremy Frees has been my point of contact on all events and he is always available and ready to respond immediately to any issues that arise. He consistently goes above and beyond and his commitment to helping organizations successfully implement green programs is a massive asset.

The entire MWR staff is always friendly and professional with a commitment to a high level of service. They always find a solution and never say, "it isn't possible." Their equipment is always good quality, in clean and presentable condition. They are willing to work to find the product that is just what you are looking for.

Being a local company allows them to adapt to changing needs quickly and to respond to any issues rapidly. With MWR you will deal with the same local, professional staff on a consistent basis, which is a huge value for large-scale events.

MWR's service is an asset to any event or organization. I highly recommend MWR.

Kind Regards,
